

RAINFORESTS OF THE WORLD

Here is where your presentation begins

CONTENTS OF THIS TEMPLATE

Here's what you'll find in this **Slidesgo** template:

1. A slide structure based on a presentation for education, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
2. An assortment of graphic resources that are suitable for use in the presentation can be found in the **alternative resources slide**.
3. A **thanks slide**, which you must keep so that proper credits for our design are given.
4. A **resources slide**, where you'll find links to all the elements used in the template.
5. **Instructions for use**.
6. Final slides with:
 - The **fonts and colors** used in the template.
 - A selection of **illustrations**. You can also customize and animate them as you wish with the online editor. Visit **Storyset** to find more.
 - More **infographic resources**, whose size and color can be edited.
 - Sets of **customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature, performing arts, SEO & marketing, and teamwork.

You can delete this slide when you're done editing the presentation

YES!

This can be the part of the presentation where you introduce yourself, write your email...

INTRODUCTION

A rainforest is characterized by towering, generally evergreen trees and heavy rainfall. Despite covering only 6% of the Earth's surface, they are immensely diverse and complex, including more than half of the world's plant and animal species

LUNGS OF THE PLANET

You can give a brief description of the topic you want to talk about here. For example, if you want to talk about Mercury, you can say that it's the smallest planet in the entire Solar System

TYPES OF RAINFORESTS

TROPICAL

The world's most ecologically diverse terrestrial ecosystems are tropical rainforests. The Amazon rainforest is the largest tropical rainforest on the planet

TEMPERATE

Tropical rainforests have more biological diversity than temperate rainforests. However, they are home to a staggering quantity of biological productivity

THE SLIDE TITLE GOES HERE!

Do you know what helps you make your point clear?

Lists like this one:

- They're simple
- You can organize your ideas clearly
- You'll never forget to buy milk!

And the most important thing: the audience won't miss the point of your presentation

AWESOME WORDS!

BULLETS POINTS ARE USEFUL

The Sun is the star at the center of the Solar System

- You can add here something useful and interesting
- You can add here something useful and interesting
- You can add here something useful and interesting
- You can add here something useful and interesting
- You can add here something useful and interesting

A PICTURE ALWAYS REINFORCES THE CONCEPT

Images reveal large amounts of data, so remember: use an image instead of a long text. Your audience will appreciate that

BIODIVERSITY IN THE RAINFORESTS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury, and its atmosphere is extremely poisonous

THIS IS A TIMELINE

2ND YEAR

4TH YEAR

Mercury is the closest planet to the Sun

Saturn is composed of hydrogen and helium

1ST YEAR

Jupiter is the biggest planet of them all

3RD YEAR

Mars is actually a very cold place

5TH YEAR

Neptune is very far away from Earth

THIS TEXT SEEMS TO BE IMPORTANT...

Rainforest biodiversity is vital to our well-being as well as the well-being of our planet.
Rainforests help to manage our climate and offer us with items we use every day

WHOA

The leaves of many plants in the humid rainforest canopy are pointed, allowing rain to drip off the points of the leaves. These "drip points" help to keep the leaves dry and mold-free

THESE ARE SOME PERCENTAGES

70%

EARTH

Earth is the place where we live on

55%

MARS

Despite being red, Mars is a cold place

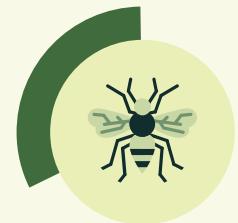

80%

MERCURY

Mercury is the closest planet to the Sun

35%

RAINFOREST FACTS

- 1 **MERCURY**
- 2 **MARS**
- 3 **VENUS**
- 4 **JUPITER**
- 5 **SATURN**

Rainforests are also found in sub-tropical and temperate zones

Rainforests cover less than 3 percent of our planet

The world's largest rainforest is the Amazon rainforest

Rainforests house more species of plants and animals than any ecosystem

Much of the life in the rainforest is found

This slide is only for Premium users

CONCLUSIONS

EARTH

Earth is the place where we live on

VENUS

Venus is the second planet from the Sun

MARS

Mars is actually a very cold place

JUPITER

Jupiter is the biggest planet of them all

CONSERVATION CONCERN

Venus has a beautiful name. It's terribly hot, even hotter than Mercury, and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon.
